

IMPORTANT NOTICE TO RESIDENTS

Just Bugs GTA will be providing a CARPENTER ANT CONTROL SERVICE in your residence on _____ starting at _____. If we are rained out we will try again on _____.

If we are treating inside your unit – All people and pets must vacate treated units for a minimum of FOUR (4) to SIX (6) hours after the treatment. You must leave upon commencement of the work. Pregnant or nursing women, children under two (2) years old, or those with allergies or respiratory problems, must vacate for EIGHT (8) to TWELVE (12) HOURS OR OVERNIGHT.

Aquariums must be covered and filters turned off.

Upon returning home please ventilate your residence and replace all contents.

If we are just treating outside, you need to keep windows and doors closed during the application, and stay away from treated areas until they are dry (allow 2 hours).

Just Bugs is licensed by the Ministry of the Environment and is a member of the SMPAO (Structural Pest Management Association of Ontario)

TO ENSURE SUCCESS PLEASE DO THE FOLLOWING PREPARATIONS

- **Remove everything from next to the outside of the house. No firewood, no lumber, no toys or barbecues within three feet of the building please.**
- **Trim all vegetation and tree branches. Vegetation should be 18 inches off the walls, and tree branches should be three feet away. Also ensure the concrete foundation is exposed, and no soil up against the siding.**
- **Reduce clutter inside! Carpenter ants hide in cluttered areas, especially near heat and in moisture. Thoroughly vacuum all floor level cracks and crevices to remove food.**
- **Fix dripping taps or leaking pipes, roof leaks, and any gaps around windows, doors, or siding that may allow moisture inside. Clean all areas of the kitchen, especially under the fridge and stove, and anywhere crumbs accumulate.**
- **Replace all rotting wood in the house, deck, or landscaping. Ensure attics and crawlspaces are properly ventilated.**

You may experience activity for up to one month after the treatment.

We will be applying Demand CS (Cyhalothrin-lambda 0.03%, PCP #27428) to the exterior, and we may use Ficam D (bendiocarb 1%, PCP#16080) and/or 110 ULV (pyrethrins 1%, PCP#11684) in structural nesting areas.

In an emergency contact Ontario Poison Centre 1.800.268.9017 or 416.813.5900 24/7 for expert poison advice 24 hours per day. Supporting all of Ontario.

IF THE ABOVE IS NOT DONE IT MAY BE IMPOSSIBLE TO ELIMINATE THE PROBLEM.
